

Politica dell'Organizzazione in materia di SSL

In order to ensure that the Organization's activity is carried out in the protection of Health and Safety, not only in conservative terms, but as an enhancement of the same, the Management defines as the reference principles of its SSL Policy:

<p>Commitment to prevention, elimination of dangers and reduction of risks</p>	<ul style="list-style-type: none"> ▪ Responsible management of the site by conducting its activities in full protection of the health and safety of workers. ▪ The planning of investments necessary for the proper functioning of plants, machines, equipment and all infrastructures in general. ▪ Providing its employees with infrastructures suitable for the activity to be carried out and with all the necessary personal and collective protection devices, also with regard to their ergonomic needs. ▪ The design and implementation of any changes, taking into consideration, as of primary importance, the safety aspects.
<p>Commitment to compliance with the law</p>	<ul style="list-style-type: none"> ▪ Compliance with the laws and regulations in force in the country of operation. ▪ The provision of training required by law, integrating it with respect to specific company problems.
<p>Commitment to continuous improvement</p>	<ul style="list-style-type: none"> ▪ The systematic assessment of the site's safety, through the implementation of a monitoring system, on the basis of which to implement continuous improvement actions. ▪ The promotion of the continuous improvement of the health and safety conditions of the site, ensuring in a preliminary way full compliance with laws and regulations.
<p>Consultation and participation of workers and third parties</p>	<ul style="list-style-type: none"> ▪ Information, training and awareness of all staff on the safety management system and its application within the organization. ▪ The promotion of a widespread sense of proactivity at every level, with an adequate degree of security, so that it is effective a sharing process that tends to improve awareness of the role that everyone plays. ▪ Appropriate communication with customers, suppliers, contractors and the general public to improve site security. ▪ Appropriate communication with the competent public authorities to establish and update emergency and safety procedures comunicazione con le autorità pubbliche competenti per stabilire ed aggiornare le procedure di emergenza e di sicurezza.

Lo strumento scelto per la persecuzione della propria Politica da parte dell'Organizzazione è un Sistema di Gestione della Sicurezza conforme alla norma UNI ISO 45001 ed. 2018.
